

Quick guide for setting up your WXM M5 bundle

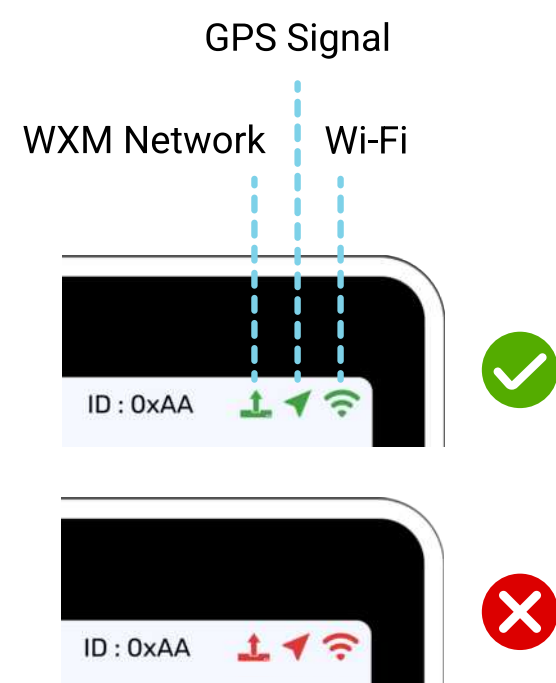

For more information go to weatherxm.com/docs

1 Plug in the GPS antenna
Power up your WXM M5 via USB
Place the antenna near a window.

2 Swipe the touch screen and follow the instructions on the screen to provide WiFi credentials and connect to home internet.

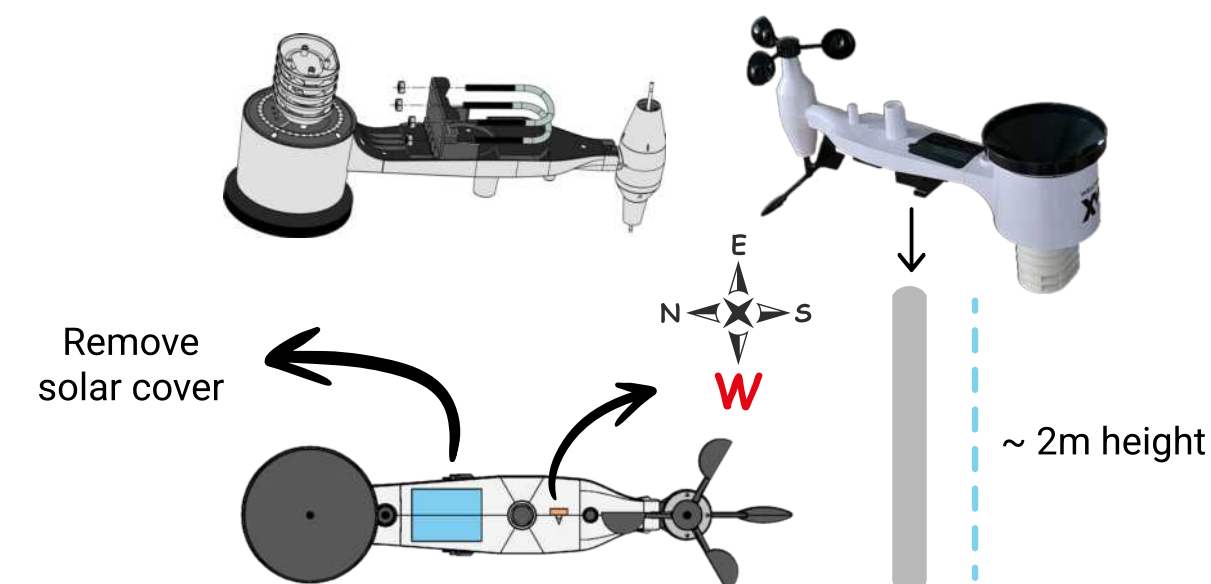

3 Insert two AA alkaline or lithium non-rechargeable batteries into the weather station.

4 Confirm connectivity on the M5's screen. **Green** icons mean connectivity is OK, **red** icons indicate an error.

5 Download the WeatherXM app from Google Play **or** visit **console.weatherxm.com** to claim device and access your weather data

6 Install the U-Brackets on the weather station and mount on outdoor pole. More details on weatherxm.com/docs
